This Utility Token is not a securities offering or collective investment scheme, nor does it require registration or approval from the Monetary Authority of Singapore, and in accordance with international financial standards.

Taxpayers are recommended to read this document carefully and carry out the due evaluation. This White Paper was developed with the collaboration of our financial market advisors and our legal advisors.

1. General Notice

Taxpayers are recommended to carefully read this document and carry out the due risk assessment, according to their personal definitions.

The XTrader Arb Token (XARB) was offered in the form of a Smart Contract - BEP20, Binance Smart chain technology and, before the very essence of this technology, once executed, this contract cannot be changed.

You acknowledge that XTrader Softwares LLC does not act as a tax agent and understands that you are responsible for following the tax laws in force in your countries.

This White Paper consists of a project prospectus called XTrader Arb, with the prediction of objectives, and structure, strategic map of implementation, legal elements that involve the type of segment and the context in which it is included. The prospectuses made here in this place do not give any guarantee to the user that all the forecasts contained in this document will be met, since they depend on external and market factors.

Any loss, loss or disadvantage that the user may have or identify due to participation in the project are assumed and absorbed exclusively by the project.

In general, users and participants of this type of project understand that when they enter the Cryptomarket, they will enter a high-risk operation that can result in losses on the amount spent. No information provided in this White Paper or on our websites should be considered as investment advice. XTrader Softwares LLC does not offer any of its users the option to purchase or sell tokens as a

investment.

The user is aware that he/she is subject to the rules and laws in force in the country in which Lives.

2. XTrader and XARB

XTrader Arb (XARB) is a utility token created on the Binance Smart Chain platform created by XTrader Softwares LLC, a company based in Delaware, USA, which develops automation systems (Robots) for the financial market, especially for the FOREX - Foreign Exchange market.

XTrader offers in its portfolio the possibility of acquiring various types of products and services. Automation systems (Robots) can be purchased for a set time, with monthly payments or with the purchase of a lifetime license. The services provided by the company include the provision of a VPS to allocate The MT4s, the installation and configuration of our systems and the sale of presets (presets and tested), as well as upgrades of these presets. The company also has the services of monitoring and supervising the accounts of customers who use our products charging a performance fee in which the company only wins if the customer wins.

With the implementation of the XARB Project, all products and services offered by XTrader Softwares LLC can be paid with the token, in which case there will also be advantageous discounts. In the case of monitoring and supervision services, XARB may also be used for the discounted payment of the performance rates of automated strategy systems used by XTrader Softwares LLC in the Forex market.

XARB's usefulness will not be restricted to XTrader products and services, as the company will also seek other partnerships to accept the token as a form of payment and discounts on their products and services. On this radar, companies that also offer physical products, not just companies with digital products, will be activated by our team.

Even though it is not an investment token, initially, the advantage that XTrader Arb (XARB) brings, by virtue of its launch price, is the possibility of acquiring a token with great potential for appreciation, since, as it will be used as a form of payments and discounts of products and services, will generate a huge interest in investors and the community in general, probably making the price rise precipitously.

It should not be forgotten that the valuation of XTrader Arb (XARB) will be governed by the law of supply and demand, however, some aspects of the project leave the possibility of an appreciation, such as:

- Initial buyers, in addition to the extremely advantageous price, will be assured that the Project will not make any public offering sofa lower than previously offered. Obviously, the market may offer values lower than those offered in the Public. In the Private Sale, held at the launch of the Project, the tokens will all be delivered together on 01/01/2022.

- There will be continued liquidity for the token, since part of the funds raised by the project will be used to monetize in the Automated Strategy Systems of XTrader Softwares LLC and 100% of the profits will be allocated in Exchanges, giving volume and liquidity to the token, aiming

at a constant and sustainable appreciation.

- XARB will be used not only as a form of payment, but also as discounts on products and services, initially by XTrader Softwares LLC, but also by other companies in the future.

In addition to what has already been exposed, XTrader Arb (XARB) has been made with a limited amount of tokens, in other words, with a high possibility of scarcity in the market.

4. Conclusion

The existence of Binance Smart Chain technology for BlockChain enabled the creation of XTrader Arb (XARB), a utility token to be used in payments and discounts of products and services, initially by XTrader Softwares LLC.

Even though it is not an investment token, the advantages and usability exposed in the White Paper make the token extremely attractive to every audience, whether investors, holders or users of XTrader products and services.
